

**DECLARATION OF COMPLIANCE**  
**(comply with annex II of regulation EC 450/2009)**

**ATCO FT oxygen absorbers** comply with regulations EC 1935/2004 and EC 450/2009, regarding active and intelligent materials and articles intended to come into contact with food.

**ATCO FT oxygen absorbers** active formulation is a mixing of mineral active matters containing iron, calcined kaolin, activated carbon, sulfur, sodium chloride and water not classified as dangerous according to Regulation 1272/2008/EC.

Subject to validation of the use terms of our products by our technicians and subject to the application of the normal use terms stated in the data sheet, **ATCO FT oxygen absorbers** are capable of achieving values below 0.1 % in perfectly welded oxygen low permeable packing (around 20 ml/m<sup>2</sup>/24 h/atm).

**ATCO FT oxygen absorbers**, under normal conditions of handling and use, are sufficiently inert not to transfer to food substances in quantities large enough to endanger human health or to bring about an unacceptable change in the composition of the food or a deterioration in its organoleptic properties. It can be used in the following conditions:

- Contact with all kind of food with the exception of liquid fractions ☒
- Only in:
  - Dry food contact ☐
  - Dry and lipophilic food contact ☐
  - Humid food contact (to the exception of liquid fractions) ☐
  - Lipophilic food contact (isooctane and ethanol 95%) ☐
  - Frozen food
    - Frozen and unfrozen in food packaging ☐
    - Frozen and unfrozen outside food packaging ☐
  - Other contact (to be described) ☐

In these conditions and based on raw material suppliers declaration of conformity, the material used for **ATCO FT oxygen absorber sachets** complies with regulations EC 10/2011 of 14/01/2011, EC 1935/2004 of 27/10/2004 and with French regulation concerning materials and objects intended to come into contact with food (décrets n°92-631 of 08/07/1992 and 2007-766 of 10/05/2007).

The compliance is subjected to the respect of storage, handling and use conditions taking into account the specific characteristics of the material or the object as expected from usage rules or professional codes.

The addressee of the present declaration must ensure the content/packaging compatibility, especially in case of modification of the packed product, its composition or its destination as far as in case of use conditions modification of the material or object.

This certificate is established in good faith and based on the present state of knowledge and experience. It replaces all previous certificates about the same reference.
