

Desi Pak® Desiccants in Contact with Food and Drugs

The FDA has determined that the films used to package Desi Pak desiccant meet the requirements of the U.S. Food and Drug Administration for contact with food and drugs:

1. The desiccant is sealed in high density polyethylene film (Tyvek, GDT or PCI) bag which meets the requirement of the FDA as stated in Title 21 of the Code of Federal Regulations section 177.1520, and in opaque film which meets the requirement of the FDA as stated in Title 21 of the Code of Federal Regulations section 177.1630, 175.105, 177.1390, 177.1395, and 177.1520 (c)(2.2) and (3.2) respectively.
2. Inks used on the film meet the requirements of the FDA as stated in Title 21 of the Code of Federal Regulations, Chapter 1, Parts 73, 74, 8a and/or Title 21, Chapter I, Subchapter B, Part 175, Subpart C, Section 175.300 as acceptable color additives.
3. Chemically, the desiccant contained in the bag is calcium bentonite. Calcium Bentonite is a neutral ground mineral and non toxic material. See clay's MSDS.
